CHRONO Series

CANTON
German loudspeaker tradition

The new CHRONO Series

The new Chrono Series consists of three floorstanding loudspeakers and two compact loudspeakers and offers the ideal model for any size of room.

Compact OnWall loudspeakers enable space-saving installation on the wall. For fans of home cinema who want to use the Chrono Series in 5.1 operation there is also a matching center speaker.

Aluminium-manganese tweeter system

The tried and tested aluminium-manganese tweeter system transmits music signals up to 40,000 Hz. A transmission front plate made of aluminium acts as a wave guide and supports the dispersion characteristics of the system.

Exclusive diamond-cut aluminium rings

The aluminium chassis is as elegant as it is impressive and comes equipped with exclusive, diamond-cut aluminium rings. These increase the mechanical stability of the loudspeaker system, which is a particular advantage at high volumes. All this goes to underline the high quality of the Chrono Series.

Cabinet geometry

At first glance the new Chrono Series appears unchanged, keeping true to its original design. A closer look, however, reveals the new styling – with diamond-cut aluminium rings, improved HDF cabinet construction with downfire bass reflex vent, conical spacer and solid socket construction.

Single-wiring connection terminal

The silver-plated screw terminals, which accept cable sizes of up to 10 mm², bring a high degree of conductivity and guarantee reliable long-term contact.

Front cover

The robust and acoustically neutral fabric covers hide the technology from view and fit neatly over the baffle. The rear-fix cover fastening on the back of the loudspeaker is a practical highlight.

Surface

The attractive combination of high gloss baffle and cabinets with structured décor is available in black or white. The exclusive diamond-cut aluminium rings give the Chrono Series its striking new look.
